

The MINERvA Operations Report

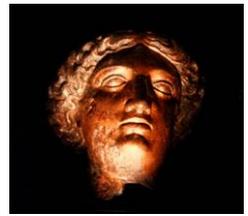

All Experimenters Meeting

Howard Budd, University of Rochester
Dec 3, 2012

MINERvA

- No detector problem created by the excavation
 - HV was left off during the excavation
 - All boards operating
- Running shifts starting 3:30PM weekdays for about 1½ hours
 - We are still leaving HV off except for shifts
 - Run PEDs and light Injection to determine if there has been any change in the detector.
 - There appears to be no change in the detector or PMTs
 - Shifter posts plots of vibration sensors
